Wan Chai, Hong Kong

13 November 2007

To: Officers-in-charge of all subvented, not-for-profit and private residential care homes for persons with disabilities

Dear Sir/Madam,

### **Prevention of Norovirus Gastroenteritis**

I attach for your attention a letter from the Centre for Health Protection (CHP) regarding the caption subject. As we are entering the peak season of viral gastroenteritis, CHP reminds you to be vigilant for the prevention of viral gastroenteritis in your institution. Should you notice an increase in the number of residents or staff with such symptoms, please contact CHP as early as possible (Fax: 2477 2770 or Tel: 2477 2772).

For enquiries about this letter, please contact our staff at 2892 5652. The copy of this letter, the attached letter and the relevant guidelines (Chinese version) on prevention of communicable diseases applicable to rehabilitation service units can be downloaded from our Department's website ([http://www.swd.gov.hk/en/index/site\\_pubsvc/page\\_rehab/sub\\_healthprot/](http://www.swd.gov.hk/en/index/site_pubsvc/page_rehab/sub_healthprot/)).

Yours faithfully,

(Mrs. Agnes Li)

for Director of Social Welfare

Encl.

c.c.

Heads of the concerned agencies providing subvented rehabilitation services  
Chief Officer, Service Development (Rehabilitation), Hong Kong Council of  
Social Service

- ◆ Use disposable towels (do not use floor mops) to wipe away all the vomitus from outside inward, before applying diluted bleach 1:49 to the surface and neighbouring area (say within two metres of the vomitus);
  - ◆ Leave for about 15 to 30 minutes to allow the bleach to inactivate viruses in the vomitus before rinsing the surface with water, and then leave it until dry;
  - ◆ Wash hands thoroughly afterwards;
  - ◆ Maintain good indoor ventilation.
4. Staff developing vomiting or diarrhoea should be advised to refrain from work and seek medical advice.

As schools, daycare and residential institutions are at risk of communicable disease outbreak, I would urge you to keep vigilance against communicable diseases. The “*Guideline on Prevention of Communicable Diseases in Residential Care Homes for the Elderly*” and “*Guideline on Prevention of Communicable Diseases in Day Care Centre/ Home Care Services/ Home-based Training and Support Service for the Elderly and Disabled Persons*” contain practical information and control measures on prevention of communicable diseases and are available at <http://www.chp.gov.hk/files/pdf/grp-elderly-tc-20070917.pdf> and [http://www.chp.gov.hk/files/pdf/grp-CSS\\_Guideline-tc-2004052100.pdf](http://www.chp.gov.hk/files/pdf/grp-CSS_Guideline-tc-2004052100.pdf) respectively. If you notice an increase in the number of residents or staff with symptoms of viral gastroenteritis or other infectious diseases, please inform the Central Notification Office of CHP as early as possible at Fax: 2477 2770 or Tel: 2477 2772, so that investigation and intervention can be initiated as soon as possible.

Yours sincerely,

(Dr SK CHUANG)
