NGOs agree that technology could enhance service delivery but there are different levels of readiness

While over 80% of NGOs agree that they need to strengthen technology adoption for service enhancement, only 40% feel ready to do so

NGO's Perception of Impact of Technology and Their Readiness to Adopt

% agree that technology adoption will significantly change service delivery and operations in the NGO sector — **82%**

% agree that NGOs need to strengthen technology adoption in the near term future for the enhancement of service delivery and operations — **85%**

% feel ready to adoption technology (to enhance service delivery and operations) — **41%**

0% 20% 40% 60% 80% 100%

The Trust has supported a range of initiatives promoting use of digital technology

1 Piloted new IT-based service models

2 Supported common applications to enable service and operational enhancement at scale

3 Supported NGO capacity development in IT planning and execution

4 Provided digital hardware to the needy

Online text-based emotional support

- Hong Kong's pioneering computer-assisted counselling

- Real time risk assessment

- Identification and categorisation of chat topics and help seekers for quality control

- ✓ **200,000+ cases handled**
- ✓ Enhanced efficiency (4x users compared to hotlines)
- ✓ Case insights generated by big data

Piloted new IT-based service models: Smart Family-Link and Social Career

Family services: Supported service delivery enhancement through the use of ICT and data analytics

Integrated service management platform for evidence-based service delivery

- Case management system
- E-platform with mobile apps to connect social workers and service users for interventions
- Online training platform for social workers

賽馬會智家樂計劃
Jockey Club
SMART Family-Link Project

✓ **26,000+ cases managed by 26 centres** benefitted from ICT-based interventions
✓ **Over 1,200 social workers** empowered to use ICT in early identification and intervention
✓ Enabled better service planning, data-informed decision-making, and improved efficiency
✓ Fostered cross-agency sharing

Volunteer management: Supported digital solutions to broaden and deepen volunteer participation

Online platform and mobile application for volunteer matching

- **Volunteer:** search, apply and record volunteer service
- **NGO:** recruit and manage volunteers, including application and attendance
