Social Work Manpower Requirements System Annual Report 2017

Executive Summary

1. Introduction

1.1 To keep track of the manpower situation in the social work field and facilitate manpower planning, a **Social Work Manpower Requirements System** (*abbreviated as SWMRS or the System throughout this report*) has been established under the Joint Committee on Social Work Manpower Requirements (the Joint Committee) for systematic collection of the employment information of the social work personnel (SWP).

1.2 The SWMRS involves local organisations which employ SWP in different sectors. To acquire up-to-date information for the SWMRS, comprehensive updating exercises are conducted annually by requesting each of these organisations to provide updated information on all SWP working in it and report any staff movement during the reference year (i.e. 1 April 2016 to 31 March 2017 for the latest updating exercise). Among the 834 organisations approached in this updating exercise, 765 replies were received with a response rate of 91.7%. Among the responses received, a total of 493 organisations confirmed that they had employed SWP in the reference year (i.e. 64.4% responding organisations have employed SWP in the reference year).

2. Profile and Movement of SWP in 2016/17

2.1 Strength⁽¹⁾ as at 31 March 2017

2.1.1 The SWMRS has recorded **14 989 filled posts** as at 31 March 2017, including 8 137 Social Work Degree Posts (including SWP in local training institutions (TIs)) and 6 852 Social Work Diploma Posts.

2.1.2 When compared with the strength as at 31 March 2016, the **growth rate** was 4.2% for Degree Posts, 3.1% for Diploma Posts and 3.7% for All Social Work Posts.

Note : (1) This refers to the total number of filled social work posts as reported by organisations.

2.2 Profile in 2016/17

2.2.1 The level of educational attainment of SWP remained high in the past three years. In 2014⁽¹⁾, 99.1% of SWP holding Degree Posts and 28.8% of SWP holding Diploma Posts had social work degree or above. In 2017⁽¹⁾, the corresponding figures were 99.2% and 32.1% respectively.

2.2.2 54.6% of SWP had been working in the social work field for over 10 years and the overall average length of service of SWP in the field was 12.9 years. The corresponding figures in 2014⁽¹⁾ were 54.5% and 12.9 years.

2.3 Movement in 2016/17

2.3.1 During 2016/17, there were 2 095 turnover cases, comprising of 1 611 re-entrant and 484 wastage cases for **All Social Work Posts**⁽²⁾. The turnover, re-entrant and wastage rates were 14.2%, 10.9% and 3.3% respectively.

2.3.2 The respective figures were 832, 525 and 307 cases for **Degree Posts**⁽³⁾, and the corresponding rates were 10.4%, 6.6% and 3.8%.

2.3.3 For **Diploma Posts**⁽⁴⁾, there were 1 263 turnover, 572 re-entrant and 691 wastage cases, and the corresponding rates were 18.7%, 8.5% and 10.2%.

- Notes :
- (1) As at 31 March of the reference year.
 - (2) There were 514 cases involving inter-grade movement, including 106 cases switching from Degree Posts to Diploma Posts and 408 cases switching from Diploma Posts to Degree Posts, which were counted as re-entrant cases but not wastage cases for All Social Work Posts.
 - (3) Cases switching from Degree Posts to Diploma Posts were counted as wastage cases but not re-entrant cases.
 - (4) Cases switching from Diploma Posts to Degree Posts were counted as wastage cases but not re-entrant cases.

3. Manpower Requirements of SWP in 2017/18 and 2018/19

3.1 All Social Work Posts

3.1.1 It is projected that the new supply for All Social Work Posts will exceed the new demand of social work graduates in 2017/18, i.e. 1 182 vis-à-vis 821. As for 2018/19, it is anticipated that the new demand for All Social Work Posts will increase significantly to a level higher than that of the new supply of social work graduates, i.e. 1 347 vis-à-vis 1 236. (Chart 5.3). With the remaining degree and diploma / associate degree graduates in the previous years, the number of graduates potentially available for joining the social work field will be about 7.8% and 5.8% (i.e. 1 196 and 940) of the respective estimated strength at the end of these two years.

3.2 Degree Posts

3.2.1 The projected new supply for Degree Posts in both 2017/18 and 2018/19 will exceed the new demand of degree graduates, i.e. 769 vis-à-vis 519 and 852 vis-à-vis 770 respectively (Chart 5.1). After excluding degree graduates occupying Diploma Posts, the number of graduates potentially available for taking up Degree Posts will be about 7.2% and 4.8% (i.e. 597 and 413) of the respective estimated strength at the end of these two years.

3.3 Diploma Posts

3.3.1 The projected new demand for Diploma Posts in 2017/18 and 2018/19 will be 789 and 1 082 respectively which, similar to the trend since 2001/02, will exceed the projected new supply of diploma / associate degree graduates of 481 in 2017/18 and 484 in 2018/19 (Chart 5.2). Since some of the Diploma Posts will be occupied by degree graduates, the number of diploma / associate degree graduates potentially available for taking up Diploma Posts will be about 8.5% and 7.0% (i.e. 599 and 527) of the respective estimated strength at the end of 2017/18 and 2018/19.

4. Major Limitations of the SWMRS

4.1 The estimated number of additional new posts as advised by the participating organisations will be affected by change of circumstances. The future demand of SWP will also depend on external factors which cannot be fully envisaged. Such factors include but are not limited to -

- (a) changes in economic and social situation which may affect the demand for welfare services;
- (b) the flexibility of organisations in employment matters (e.g. determining the number of posts to be created / deleted, setting specific entry requirements of such posts, etc.) under the Lump Sum Grant Subvention System;
- (c) contracting out of welfare services by competitive bidding; and
- (d) slippage of welfare projects and / or introduction of new welfare initiatives within the projection cycle.

4.2 Moreover, an inherent difficulty for all manpower projections is to forecast the wastage rate and non-entry rate as they are affected by a number of unpredictable factors, including the availability of other jobs in the labour market, competition from overseas / the Mainland for social work staff, personal choice for leaving the sector such as further studies / family commitment / health reason / early retirement / extension of retirement age, changes in career aspiration / working environment / career prospects, etc. To take such factors into account requires the making of a number of judgmental assumptions, which are beyond the scope of this statistical exercise.

PART I INTRODUCTION

- 1.1 Manpower is an important concern in the development of social welfare services in Hong Kong. To facilitate manpower planning, a **Joint Committee on Social Work Manpower Requirements** (the Joint Committee) comprising representatives from the Social Welfare Department (SWD) and the Hong Kong Council of Social Service (HKCSS) has been formed since July 1987 for the purpose. Its terms of reference and membership are at *Appendix I*.
- 1.2 Under the Joint Committee, a Social Work Manpower Planning System was established. Since 2005, it has been renamed as **Social Work Manpower Requirements System** (*abbreviated as SWMRS or the System throughout this report*) to better reflect its functions. The System undertakes systematic collection of the employment information of the social work personnel (SWP) for keeping track of the manpower situation in the social work field. It involves various local organisations employing SWP in different sectors which are broadly classified into three categories, namely, (a) government departments including SWD; (b) local training institutions (TIs) offering social work training programmes; and (c) non-governmental organisations (NGOs), including all subvented and self-financing welfare organisations, other major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools), hospitals under Hospital Authority (HA), special schools subvented by Education Bureau (EDB), and service units subvented by Home Affairs Bureau (HAB). Based on the data collected from the local training institutions and organisations employing SWP, the Joint Committee publishes a report every year and shares it with the Advisory Committee on Social Work Training and Manpower Planning (ACSWTMP), the Social Welfare Advisory Committee, Labour and Welfare Bureau, EDB, participating organisations, local training institutions and relevant organisations.
- 1.3 The main features of the SWMRS are as follows:
- (a) the objectives, coverage and data collection mechanism - *Appendix II (A)*;
 - (b) the method of compiling the collected data and projecting the social work manpower requirements figures - *Appendix II (B)*;
 - (c) the glossary - *Appendix II (C)*; and
 - (d) the list of organisations employing SWP covered by the SWMRS - *Appendix II (D)*.

- 1.4 This report is compiled with reference to the various manpower figures collected as at 31 March 2017, the estimated number of graduates for 2017 and 2018 as at November 2017 and the estimated demand figures for 2017/18 and 2018/19 as at November 2017. Relevant key statistics including the estimated number of graduates, the estimated figures on non-entry rates and wastage rates are listed in *Appendices III (A) to (C)* respectively.
- 1.5 There may be slight differences between the sum of individual items and the total as shown in the statistical tables owing to the rounding up or down of figures.

PART II PROJECTED MANPOWER REQUIREMENTS FOR 2017/18 AND 2018/19

1. Introduction

- 1.1 The manpower requirements of SWP by entry requirements (i.e. Degree Posts, Diploma Posts and All Social Work Posts), as well as the aggregate figures for the whole welfare sector, will cover a period of two projection years in this report, i.e. 2017/18 and 2018/19.
- 1.2 The projected new supply depends largely on the estimated number of graduates of local TIs in the year. In addition, information on non-entrants, new entrants with qualifications obtained overseas and previous years' remaining social work graduates of local TIs will be duly accounted for. On the other hand, the projected new demand covers the net additional staff requirements as reported by participating organisations and the demand for replacement of wastage. Details of the projection methodology including the working assumptions are in *Appendix II (B)*. Relevant key statistics are in *Appendices III (A) to (C)*.
- 1.3 The working assumptions adopted in the compilation of the manpower figures have been thoroughly considered by the Joint Committee. The outcome of this statistical exercise can only be regarded as one of the many possible scenarios of the future outlook that will occur under the assumed situation. Readers should take note of the details of the compilation methodology and interpret the outcome with due regard to the assumptions adopted.
- 1.4 It should be noted that the estimated number of additional new posts will be affected by change of circumstances. The exercise is primarily operated on a statistical methodology with a set of well-defined quantitative variables. There are other variables which fall outside the scope of the exercise but may affect the future demand of SWP, hence the accuracy of the outcome. Readers should take note of this when reading the report.

2. Points to Note about the Projection Methodology

2.1 Projection of Supply

2.1.1 *Non-entry rates:* Throughout the period of projection, the non-entry rates on the supply of degree graduates (*including master degree graduates*) and diploma / associate degree graduates are assumed to be 8.0% and 16.2% respectively (please see paragraph 2.3.3 of *Appendix II(B)*).

2.1.2 *Previous Years' Remaining Graduates:* It is observed that some graduates of local TIs do not enter the social work field right away in the year of graduation but may do so in later years. As such, it is believed that there should be some "remaining graduates" of previous years who will continue to search for jobs in the social work field. The numbers of "remaining graduates" are estimated on the basis of the following three main assumptions:

- (a) a fixed proportion of new graduates in the current year (i.e. 2016 for this updating exercise) and remaining graduates in all preceding years will not seek jobs in the field at the beginning of each financial year;
- (b) the wastage rate of graduate supply, which is assumed to be constant for both new graduates of current year and remaining graduates in all preceding years, is estimated by the following constraint optimisation exercise:

Maximise: Yearly wastage rate of graduate supply

Subject to the following constraints:

- (i) *the net entrant rate⁽¹⁾ of current year graduates is not less than that of previous years' remaining graduates (if the number of remaining graduates at the beginning of the year is greater than 50); and*
 - (ii) *the net entrant rate of remaining graduates for the period cannot exceed 100%.*
- (c) graduates are of similar competitiveness irrespective of their years of graduation.

Note : (1) The net entrant rate of graduates is defined as the number of graduates taking up social work posts during the year divided by the net supply of graduates at the beginning of the year.

2.1.3 *Graduates Potentially Available for Joining the Social Work Field:* Under the existing projection methodology, the “Graduates Potentially Available for Joining the Social Work Field” at the end of the first projection year will be carried forward to the second projection year as the supply of “Previous Years’ Remaining Graduates” after discounting the non-entry graduates with the assumed non-entry rates mentioned in paragraph 2.1.1 above.

2.1.4 *All Social Work Posts:* For All Social Work Posts of the whole sector, graduates of part-time degree programmes requiring social work academic qualification (such as diploma / higher diploma / associate degree in social work) and / or Registered Social Worker (RSW) qualification for admission are not counted. Nevertheless, they are still counted as the new supply of graduates for Degree Posts.

2.2 Projection of Demand

2.2.1 *Wastage rate:* The wastage rate of the strength of the Degree Posts is assumed to be 4.5%⁽¹⁾ for 2017/18 to 2018/19. The wastage rate of the strength of the Diploma Posts is assumed to be 8.7%⁽¹⁾ for 2017/18 to 2018/19.

2.2.2 *Inter-grade movement:* SWP occupying Diploma Posts who later switched to Degree Posts either in the same or different organisations are regarded as new entrants to the Degree Posts and wastage to the Diploma Posts, and vice versa. This partly explains why the wastage rate for the Diploma Posts is normally higher than that of the Degree Posts.

2.2.3 *Wastage cases for All Social Work Posts:* The number of estimated wastage cases for All Social Work Posts is equal to the estimated number of wastage cases for Degree Posts plus the estimated number of wastage cases for Diploma Posts minus the estimated number of cases involving inter-grade movement (i.e. SWP switching from Diploma Posts to Degree Posts and vice versa).

Note : (1)It refers to the “three-year weighted average wastage rate of 2014/15, 2015/16 and 2016/17”. Cases involving inter-grade movement are included.

2.2.4 *Modified approach for calculation of the net additional staff requirements for the second projection year:* In response to the development of the social welfare sector, various means had been introduced to enhance the estimation of the net additional staff requirements. Moreover, starting from the 2007 round of updating exercise, a modified approach has been employed for calculating the net additional staff requirements figures for the second projection year in order to take into account the more conservative approach adopted by most of the data suppliers in the estimation.

3. Manpower Requirements for Degree Posts

After excluding those already occupying Diploma Posts, the number of degree graduates potentially available for taking up Degree Posts will be about 7.2% and 4.8% of the respective estimated strength at the end of 2017/18 and 2018/19.

	<i>Financial Year</i>	
	<u>2017/18</u>	<u>2018/19</u>
I. New Supply of Degree Graduates⁽¹⁾		
<i>(Year of Graduation for (1) and (2))</i>	<i>(2017)</i>	<i>(2018)</i>
(1) Graduates of local TIs for the year	828	917
(2) Non-entrants	66	73
(3) New entrants with overseas qualifications	7	8
<i>Total [i.e. (1) – (2) + (3)]</i>	769	852
II. New Demand for Degree Posts		
(4) Net additional staff requirements	149	388
(5) Replacement for wastage	370	382
<i>Total [i.e. (4) + (5)]</i>	519	770
III. Balance Between New Supply and New Demand		
At end of the year <i>[i.e. I – II]</i>	250	82
IV. Previous Years' Remaining Graduates of Local TIs		
At end of the year	1 845	1 927
V. Graduates Potentially Available for Joining Social Work Field		
At end of the year <i>[i.e. III + IV]</i>	2 095 ⁽²⁾	2 009 ⁽²⁾
<i>- No. of degree graduates occupying Diploma Posts</i>	<i>(1 498)</i>	<i>(1 596)</i>
VI. Estimated Strength		
At end of the year	8 286	8 674

Notes : (1) The figures also include graduates of postgraduate programmes recognised by the Social Workers Registration Board for registration.

(2) Some of these graduates could be occupying Diploma Posts as well as non-social work posts such as welfare workers in the social welfare sector.

4. Manpower Requirements for Diploma Posts

For diploma / associate degree graduates, the number of graduates potentially available for taking up Diploma Posts will be about 8.5% and 7.0% of the respective estimated strength at the end of 2017/18 and 2018/19. In addition, a number of Diploma Posts will be occupied by degree graduates.

	<i>Financial Year</i>	
	<u>2017/18</u>	<u>2018/19</u>
I. New Supply of Diploma / Associate Degree Graduates		
<i>(Year of Graduation for (1), (2) and (3))</i>	<i>(2017)</i>	<i>(2018)</i>
(1) Diploma graduates of local TIs for the year	390	450
(2) Associate degree graduates of local TIs for the year	180	124
(3) Non-entrants	92	93
(4) New entrants with overseas qualifications	3	3
<i>Total [i.e. (1) + (2) – (3) + (4)]</i>	481	484
II. New Demand for Diploma Posts		
(5) Net additional staff requirements ⁽¹⁾	185	450
(6) Replacement for wastage	604	632
<i>Total [i.e. (5) + (6)]</i>	789	1 082
III. Diploma Posts Filled by Remaining Degree Graduates		
At end of the year	370	492
IV. Diploma Posts Filled by Degree Re-entrants		
At end of the year	125	131
V. Balance Between New Supply and New Demand		
At end of the year <i>[i.e. I – (II – III – IV)]</i>	187	25
VI. Previous Years' Remaining Graduates of Local TIs		
At end of the year	412	502
VII. Graduates Potentially Available for Joining Social Work Field		
At end of the year <i>[i.e. V + VI]</i>	599 ⁽²⁾	527 ⁽²⁾
VIII. Estimated Strength		
At end of the year	7 037	7 487

Notes : (1) New posts with RSW set as the entry requirement but without specifying the social work academic qualifications are counted as Diploma Posts, irrespective of whether the organisations may actually look for social work degree holders to fill the vacancies.

(2) Some of these graduates could be occupying non-social work posts such as welfare workers in the social welfare sector.

5. Manpower Requirements for All Social Work Posts

For all social work graduates, the number of graduates potentially available for joining the social work field will be about 7.8% and 5.8% of the respective estimated strength at the end of 2017/18 and 2018/19.

	<i>Financial Year</i>	
	<u>2017/18</u>	<u>2018/19</u>
I. New Supply of Social Work Graduates⁽¹⁾		
<i>(Year of Graduation for (1) and (2))</i>	<i>(2017)</i>	<i>(2018)</i>
(1) Graduates of local TIs for the year	1 324	1 383
(2) Non-entrants	152	158
(3) New entrants with overseas qualifications	10	11
<i>Total [i.e. (1) – (2) + (3)]</i>	1 182	1 236
II. New Demand for Social Work Posts		
(4) Net additional staff requirements	334	838
(5) Replacement for wastage ⁽²⁾	487	509
<i>Total [i.e. (4) + (5)]</i>	821	1 347
III. Balance Between New Supply and New Demand		
<i>At end of the year [i.e. I – II]</i>	361	-111
IV. Previous Years' Remaining Graduates of Local TIs		
<i>At end of the year</i>	835	1 051
V. Graduates Potentially Available for Joining Social Work Field		
<i>At end of the year [i.e. III + IV]</i>	1 196 ⁽³⁾	940 ⁽³⁾
VI. Estimated Strength		
<i>At end of the year</i>	15 323	16 161

Notes : (1) The figures do not include graduates of part-time degree programmes which require social work academic qualification (such as diploma / higher diploma / associate degree in social work) and / or RSW qualification for admission.

(2) The figures do not include cases involving inter-grade movement, i.e. cases switching from Diploma Posts to Degree Posts and those switching from Degree Posts to Diploma Posts.

(3) Some of these graduates could be occupying non-social work posts such as welfare workers in the social welfare sector.

PART III MOVEMENT AND PROFILE OF SOCIAL WORK PERSONNEL (SWP) IN 2016/17

(A) Movement of SWP

1. Introduction

1.1 This Section presents key statistics showing the strength, recruitment, turnover, re-entrant and wastage cases during the reference year of 1 April 2016 to 31 March 2017. Summary statistics on the distribution patterns are also included.

1.2 The System has recorded **14 989 filled posts (strength)** as at 31 March 2017, with 8 137 for **Degree Posts** and 6 852 for **Diploma Posts**.

<i>Post type</i>	<i>Strength as at 31 March 2017</i>			
	<i>NGOs⁽¹⁾</i>	<i>SWD</i>	<i>TIs</i>	<i>Total</i>
Degree Posts ⁽²⁾	5 898 (+5.0%)	1 671 (+1.8%)	568 (+3.5%)	8 137 (+4.2%)
Diploma Posts ⁽²⁾	6 345 (+3.2%)	507 (+2.4%)	-	6 852 (+3.1%)
<i>All Social Work Posts</i>	12 243 (+4.0%)	2 178 (+1.9%)	568 (+3.5%)	14 989 (+3.7%)

Notes : (1) The figures for NGOs include SWD-subvented posts, non-SWD-subvented posts and other posts. Non-SWD-subvented posts include those subvented by EDB and HAB while other posts include those in HA, non-subvented posts in NGOs and major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools).

(2) Degree Posts refer to posts requiring social work degree qualification or above while Diploma Posts refers to posts requiring social work diploma / associate degree qualification.

The figures in brackets represent changes when compared with corresponding figures as at 31 March 2016.

1.3 Compared with the corresponding figures on **strength** of 7 807 for **Degree Posts** and 6 646 for **Diploma Posts** as at 31 March 2016, the **growth rates** for these two categories of posts were 4.2% and 3.1% respectively. The strength of the whole social work field increased by 3.7% when compared with the figure as at 31 March 2016.

1.4 NGOs recorded the highest growth rate for **All Social Work Posts** (4.0%), followed by 3.5% and 1.9% for local TIs and SWD respectively.

1.5 The System has recorded 2 095 turnover cases for All Social Work Posts in 2016/17, consisting of 1 611 re-entrant cases and 484 wastage cases.

Movement of SWP in 2016/17
(respective rates⁽¹⁾ shown in %)

<u>Post type</u>	<u>Turnover</u>	<u>Re-entrant</u>	<u>Wastage</u>
Degree Posts ⁽²⁾	832 (10.4%)	525 (6.6%)	307 (3.8%)
Diploma Posts ⁽³⁾	1 263 (18.7%)	572 (8.5%)	691 (10.2%)
<i>All Social Work Posts</i> ⁽⁴⁾	2 095 (14.2%)	1 611 (10.9%)	484 (3.3%)

- Notes :
- (1) The respective rates are the number of cases over the average of strength of 2016/17.
 - (2) Cases switching from Degree Posts to Diploma Posts were counted as wastage cases but not re-entrant cases.
 - (3) Cases switching from Diploma Posts to Degree Posts were counted as wastage cases but not re-entrant cases.
 - (4) There were 514 cases involving inter-grade movement, including 106 cases switching from Degree Posts to Diploma Posts and 408 cases switching from Diploma Posts to Degree Posts (please see paragraph 4.4 in Part III(A)), which were counted as re-entrant cases for All Social Work Posts and excluded from the number of wastage cases for All Social Work Posts.

2. Recruitment Cases

2.1 There were 2 588 **recruitment cases** in 2016/17.

By post

- 43.7% were of *Degree Posts*
- 56.3% were of *Diploma Posts*

2.2 Among the recruitment cases, 89.3% were reported by NGOs, followed by local TIs (7.2%) and SWD (3.4%).

<u>Sector</u>	<u>Degree Posts</u>		<u>Diploma Posts</u>		<u>All Social Work Posts</u>	
	<u>No.</u>	<u>%</u>	<u>No.</u>	<u>%</u>	<u>No.</u>	<u>%</u>
NGOs ⁽¹⁾	883	78.1	1 429	98.1	2 312	89.3
SWD	61	5.4	28	1.9	89	3.4
TIs	187	16.5	-	-	187	7.2
<i>Total</i>	1 131	100.0	1 457	100.0	2 588	100.0
	(-3.9%)		(+0.6%)		(-1.4%)	

Note: (1) The figures for NGOs include SWD-subvented posts, non-SWD-subvented posts and other posts. Non-SWD-subvented posts include those subvented by EDB and HAB while other posts include those in HA, non-subvented posts in NGOs and major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools).

The figures in brackets denote changes when compared with corresponding figures in 2015/16.

3. Turnover Cases

3.1 A total of 2 095 **turnover cases** were recorded in 2016/17, representing an overall turnover rate of 14.2%.

By post

- 39.7% were of Degree Posts
- 60.3% were of Diploma Posts

3.2 The **turnover rate** for Degree Posts was 10.4% while that for Diploma Posts was 18.7%. Degree Posts in local TIs recorded the highest turnover rate of 30.2%.

<u>Post</u>	<u>NGOs⁽¹⁾</u>		<u>SWD</u>		<u>TIs</u>		<u>Total</u>	
	<u>No.</u>	<u>Turnover rate (%)</u>	<u>No.</u>	<u>Turnover rate (%)</u>	<u>No.</u>	<u>Turnover rate (%)</u>	<u>No.</u>	<u>Turnover rate (%)</u>
Degree Posts	631	10.9	32	1.9	169	30.2	832	10.4
Diploma Posts	1 247	19.9	16	3.2	-	-	1 263	18.7
<i>All Social Work Posts</i>	1 878	15.6	48	2.2	169	30.2	2 095	14.2

Note: (1) The figures for NGOs include SWD-subsented posts, non-SWD-subsented posts and other posts. Non-SWD-subsented posts include those subsented by EDB and HAB while other posts include those in HA, non-subsented posts in NGOs and major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools).

3.3 For the turnover cases, the respective length of service of the SWP in the organisations **prior to their leaving the jobs** are shown below:

<p><i>Overall</i></p> <ul style="list-style-type: none"> • 60.6% worked for 3 years or less <p><i>Average length of service by sector</i></p> <ul style="list-style-type: none"> • 4.2 years for NGOs⁽¹⁾ • 21.0 years for SWD • 1.9 years for local TIs • 4.4 years for all three sectors

<i>Length of service in organisation prior to leaving (years)</i>	<i>NGOs⁽¹⁾</i>		<i>SWD</i>		<i>TIs</i>		<i>Total</i>	
	<i>No.</i>	<i>%</i>	<i>No.</i>	<i>%</i>	<i>No.</i>	<i>%</i>	<i>No.</i>	<i>%</i>
1 or less	447	23.8	4	8.3	137	81.1	588	28.1
More than 1 to 2	388	20.7	4	8.3	5	3.0	397	18.9
More than 2 to 3	283	15.1	-	-	2	1.2	285	13.6
More than 3 to 4	167	8.9	1	2.1	4	2.4	172	8.2
More than 4 to 5	117	6.2	1	2.1	1	0.6	119	5.7
More than 5 to 10	292	15.5	4	8.3	13	7.7	309	14.7
More than 10 to 15	74	3.9	2	4.2	-	-	76	3.6
More than 15 to 20	57	3.0	1	2.1	5	3.0	63	3.0
More than 20	53	2.8	31	64.6	2	1.2	86	4.1
<i>Total</i>	1 878	100.0	48	100.0	169	100.0	2 095	100.0

Note: (1) The figures for NGOs include SWD-subsented posts, non-SWD-subsented posts and other posts. Non-SWD-subsented posts include those subsented by EDB and HAB while other posts include those in HA, non-subsented posts in NGOs and major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools).

4. Re-entrant Cases

4.1 There were 525 and 572 re-entrant cases⁽¹⁾ for Degree Posts and Diploma Posts respectively in 2016/17, representing 6.6% and 8.5% of the respective average strength.

4.2 A significant proportion of SWP (57.7% of Degree Posts and 97.4% of Diploma Posts) were found to have moved among agencies within the NGO sector.

<i>Sector SWP leaving from</i>	<i>Degree Posts</i>			<i>Diploma Posts</i>	
	<i>Sector SWP re-entering to</i>			<i>Sector SWP re-entering to</i>	
	<i>NGOs⁽²⁾</i>	<i>SWD</i>	<i>TIs</i>	<i>NGOs⁽²⁾</i>	<i>SWD</i>
NGOs ⁽²⁾	303	23	42	557	14
SWD	1	1	5	1	-
TIs	17	-	133	-	-
<i>Total</i>	321	24	180	558	14

4.3 Among the re-entrant cases of Degree Posts, 67.8% had a break of service in the field for half a year or less while 14.1% for more than two years. For re-entrant cases of Diploma Posts, the corresponding figures are 67.0% and 12.9% respectively.

Average duration for break of service

- 14.1 months for Degree Posts
- 10.7 months for Diploma Posts

<i>Duration for a break of service in the field (years)</i>	<i>Degree Posts</i>		<i>Diploma Posts</i>		<i>Total</i>	
	<i>No.</i>	<i>%</i>	<i>No.</i>	<i>%</i>	<i>No.</i>	<i>%</i>
½ or less	356	67.8	383	67.0	739	67.4
More than ½ to 1	55	10.5	64	11.2	119	10.8
More than 1 to 1½	25	4.8	34	5.9	59	5.4
More than 1½ to 2	15	2.9	17	3.0	32	2.9
More than 2 to 4	32	6.1	49	8.6	81	7.4
More than 4	42	8.0	25	4.4	67	6.1
<i>Total</i>	525	100.0	572	100.0	1 097	100.0

Notes : (1) Re-entrant cases refer to SWP posts being filled by persons whose preceding posts were in the same grade in the field. The figures do not include SWP who were serving in the field and took up other additional posts.
 (2) The figures for NGOs include SWD-subvented posts, non-SWD-subvented posts and other posts. Non-SWD-subvented posts include those subvented by EDB and HAB while other posts include those in HA, non-subvented posts in NGOs and major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools).

4.4 Apart from re-entrant cases within the same grade, there are also cases involving inter-grade movement (i.e. switching from Degree Posts to Diploma Posts, and vice versa). As recorded in 2016/17, there were 106 cases switching from Degree Posts to Diploma Posts and 408 cases switching from Diploma Posts to Degree Posts.

<i>Sector SWP leaving from</i>	<i>Inter-grade Movement</i>	
	<i><u>From Degree Posts to Diploma Posts</u></i>	<i><u>From Diploma Posts to Degree Posts</u></i>
NGOs ⁽¹⁾	104	400
SWD	2	8
TIs	-	-
<i>Total</i>	106	408

Note: (1) The figures for NGOs include SWD-subvented posts, non-SWD-subvented posts and other posts. Non-SWD-subvented posts include those subvented by EDB and HAB while other posts include those in HA, non-subvented posts in NGOs and major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools).

5. Wastage Cases

5.1 The number of wastage cases in 2016/17 was 307 for Degree Posts⁽¹⁾ and 691 for Diploma Posts⁽¹⁾, with the respective wastage rates being 3.8% and 10.2%. Analysed by sector⁽²⁾, Diploma Posts in NGOs recorded the largest number of wastage cases, i.e. 676 cases (10.8%).

<u>Post</u>	<u>NGOs⁽³⁾</u>		<u>SWD</u>		<u>TIs</u>		<u>Total</u>	
	<u>No.⁽²⁾</u>	<u>Wastage rate (%)</u>	<u>No.⁽²⁾</u>	<u>Wastage rate (%)</u>	<u>No.⁽²⁾</u>	<u>Wastage rate (%)</u>	<u>No.</u>	<u>Wastage rate (%)</u>
Degree Posts ⁽¹⁾	263	4.6	25	1.5	19	3.4	307	3.8
Diploma Posts ⁽¹⁾	676	10.8	15	3.0	-	-	691	10.2

5.2 After deducting the cases of inter-grade movement (i.e. cases switching from Diploma Posts to Degree Posts and those switching from Degree Posts to Diploma Posts), the number of wastage cases for All Social Work Posts⁽⁴⁾ was 484, with the corresponding wastage rate of 3.3%. Analysed by sector, NGOs recorded the largest number of wastage cases, i.e. 435 cases (3.6%).

<u>Post</u>	<u>NGOs⁽³⁾</u>		<u>SWD</u>		<u>TIs</u>		<u>Total</u>	
	<u>No.⁽²⁾</u>	<u>Wastage rate (%)</u>	<u>No.⁽²⁾</u>	<u>Wastage rate (%)</u>	<u>No.⁽²⁾</u>	<u>Wastage rate (%)</u>	<u>No.</u>	<u>Wastage rate (%)</u>
All Social Work Posts ⁽⁴⁾	435	3.6	30	1.4	19	3.4	484	3.3

- Notes :
- (1) The figures include cases involving inter-grade movement.
 - (2) "Wastage by sector" is defined as the number of SWP in the grade who left the sector in a reference year less the number of SWP rejoining the social work field (regardless of whether the same sector or not) in the same reference year. Under such definition, a proxy estimation has been made by assuming that the number of SWP who left the job from a sector (NGOs, SWD or local TIs, etc.) in a reference year and those who would rejoin the field again in the same reference year or afterwards would be the same as the number of SWP re-joining the field in the reference year and whose preceding post was in the same grade in that sector. This definition has been adopted starting from the 2010 round of the updating exercise.
 - (3) The figures for NGOs include SWD-subvented posts, non-SWD-subvented posts and other posts. Non-SWD-subvented posts include those subvented by EDB and HAB while other posts include those in HA, non-subvented posts in NGOs and major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools).
 - (4) There were 514 cases involving inter-grade movement, including 106 cases switching from Degree Posts to Diploma Posts and 408 cases switching from Diploma Posts to Degree Posts, which were excluded from the number of wastage cases for All Social Work Posts (please see paragraph 4.4 in Part III(A)).

(B) Profile of SWP

1. Highest Educational Attainment

<ul style="list-style-type: none"> • 99.2% of SWP occupying Degree Posts • 99.9% of SWP occupying Diploma Posts 	} possessed the required social work qualification or above
---	---

<u>Highest educational attainment</u>	<u>Degree Posts⁽¹⁾</u>		<u>Diploma Posts</u>		<u>All Social Work Posts</u>

More than 10 to 15	1 915	15.6	291	13.4	55	9.7	2 261	15.1
More than 15 to 20	1 479	12.1	269	12.4	62	10.9	1 810	12.1
More than 20	2 542	20.8	1 173	53.9	401	70.6	4 116	27.5
<i>Total</i>	12 243	100.0	2 178	100.0	568	100.0	14 989	100.0

Notes : (1) Other than a social work degree, Certificate in Social Studies, Certificate in Social Work and Diploma in Social Work were entry qualifications for Degree Posts in the 1960s and 1970s.

(2) The figures for NGOs include SWD-subvented posts, non-SWD-subvented posts and other posts. Non-SWD-subvented posts include those subvented by EDB and HAB while other posts include those in HA, non-subvented posts in NGOs and major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools).

3. Full-time / Part-time Posts

3.1 Among the 14 989 SWP posts, **most** of them (94.9% or 14 230) were **full-time posts**. There were 759 part-time posts, 46.1% were in local TIs and they were all Degree Posts.

<u>Sector / post</u>	<u>Full-time posts</u>		<u>Part-time posts</u>		<u>Total</u>	
	<u>No.</u>	<u>%</u>	<u>No.</u>	<u>%</u>	<u>No.</u>	<u>%</u>
<u>NGOs⁽¹⁾</u>						
Degree Posts	5 694	38.0	204	1.4	5 898	39.3

<u>TIs</u>						
Degree Posts	218	1.5	350	2.3	568	3.8
<i>Total</i>	14 230	94.9	759	5.1	14 989	100.0

Note: (1) The figures for NGOs include SWD-subvented posts, non-SWD-subvented posts and other posts. Non-SWD-subvented posts include those subvented by EDB and HAB while other posts include those in HA, non-subvented posts in NGOs and major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools).

3.2 The 14 989 SWP posts were taken up by **14 809 persons**. Majority of them (98.9% or 14 640) held one post only.

<u>No. of posts taken up</u>	<u>No. of persons</u>	<u>%</u>
One full-time post	14 108	95.3
One full-time post plus one or more part-time posts	122	0.8
One part-time post	532	3.6
Two or more part-time posts	47	0.3
<i>Total</i>	14 809	100.0

(C) Comparison of Major Characteristics of SWP in the Past Years

1. Reported Strength⁽¹⁾

- The total number of SWP increased by 1 720 between 2013/14 and 2016/17 or at an average annual growth rate of 4.1%.
- The strength of Degree Posts and Diploma Posts increased by 876 and 844 respectively during the period.

	<u>2016/17</u>		<u>2015/16</u>		<u>2014/15</u>		<u>2013/14</u>	
	<u>No.</u>	<u>%</u>	<u>No.</u>	<u>%</u>	<u>No.</u>	<u>%</u>	<u>No.</u>	<u>%</u>
1.1. Total number of SWP	14 989	-	14 453	-	13 907	-	13 269	-
1.2. <u>Degree Posts</u>	<u>8 137</u>	<u>100.0</u>	<u>7 807</u>	<u>100.0</u>	<u>7 552</u>	<u>100.0</u>	<u>7 261</u>	<u>100.0</u>
NGOs ⁽²⁾	5 898	72.5	5 616	71.9	5 345	70.8	5 107	70.3
SWD	1 671	20.5	1 642	21.0	1 621	21.5	1 617	22.3
TIs	568	7.0	549	7.0	586	7.8	537	7.4
1.3. <u>Diploma Posts</u>	<u>6 852</u>	<u>100.0</u>	<u>6 646</u>	<u>100.0</u>	<u>6 355</u>	<u>100.0</u>	<u>6 008</u>	<u>100.0</u>
NGOs ⁽²⁾	6 345	92.6	6 151	92.6	5 860	92.2	5 517	91.8
SWD	507	7.4	495	7.4	495	7.8	491	8.2

Notes : (1) The figures refer to all filled posts as reported by organisations as at 31 March of the respective years.

(2) The figures for NGOs include SWD-subvented posts, non-SWD-subvented posts and other posts. Non-SWD-subvented posts include those subvented by EDB and HAB while other posts include those in HA, non-subvented posts in NGOs and major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools).

2. Highest Educational Attainment

- The proportion of SWP in Diploma Posts having social work degree and diploma / associate degree or equivalent qualification remained stable at about 30% and 70% respectively for 2013/14, 2014/15 and 2015/16. In 2016/17, the corresponding proportions were about 32% and 68%.

	<u>2016/17</u>		<u>2015/16</u>		<u>2014/15</u>		<u>2013/14</u>

(3) The upper (third) quartile turnover rate is the turnover rate that delineates the lowest 75% of all the organisations concerned.

PART IV ANALYSIS OF PAST TREND

(A) Demand-Supply Analysis on Degree, Diploma and All Social Work Posts from 1997/98 to 2018/19

1. Introduction

- 1.1 The new supply of graduates refers to the number of new graduates of local TIs in the reference year plus new entrants with overseas qualification minus non-entrants.
- 1.2 The new demand for posts refers to the sum of net additional staff requirements and replacement of wastage.

2. Degree Posts (Chart 5.1)

- 2.1 The new supply of degree graduates remained stable at around 350 to 400 places each year during the period from 1997/98 to 2004/05. Due to the introduction of new undergraduate and postgraduate programmes, the new supply of degree graduates has increased since 2005/06 and the projected new supply in 2017/18 and 2018/19 will be 769 and 852 respectively.
- 2.2 The new supply of degree graduates exceeded the new demand for Degree Posts for most of the years during the period from 1997/98 to 2016/17 (except 2002/03, 2005/06 to 2007/08 and 2011/12). Owing to higher flexibility in employment under the Lump Sum Grant Subvention System, some organisations tend to set the minimum entry requirement for new posts at the level of RSW without specifying the social work academic qualification (i.e. degree level or diploma / associate degree level), resulting in the slow growth of demand for Degree Posts before 2006/07. The new demand for Degree Posts stood at high levels in the range between 498 and 756 during the period from 2006/07 to 2014/15. While it decreased from 650 in 2015/16 to 637 in 2016/17, the number of projected new demand for Degree Posts will drop further to 519 in 2017/18. However, a sharp rise to 770 will be recorded in 2018/19.
- 2.3 Although there were surplus between the new supply of degree graduates and the new demand for Degree Posts, it is observed that majority of the remaining degree graduates have taken up Diploma Posts in the social work field (please refer to the analysis in Part IV(B)).

3. Diploma Posts (Chart 5.2)

- 3.1 The new supply of diploma / associate degree graduates decreased continuously during the period from 1997/98 to 2006/07 and increased in the years 2007/08 and between 2012/13 and 2014/15. While it increased from 426 in 2015/16 to 498 in 2016/17, the number of projected new supply for Diploma Posts will drop to 481 in 2017/18 and then increase slightly to 484 in 2018/19. On the other hand, the new demand for Diploma Posts recorded a fluctuating but upward trend during the period from 1997/98 to 2016/17. The number of projected new demand for Diploma Posts will drop to 789 in 2017/18 and then increase largely to 1 082 in 2018/19.
- 3.2 There has been a persistent shortage gap between the new supply of diploma / associate degree graduates and the new demand for Diploma Posts since 2001/02. Nevertheless, some of the Diploma Posts have been occupied by the remaining degree graduates and degree re-entrants (i.e. degree graduates not occupying posts requiring degree qualification), resulting in a relatively low entry rate of diploma / associate degree graduates (please refer to the analysis in Part IV(B)). With this taken into account, the projected new supply will likely exceed the new demand for Diploma Posts in 2017/18 and 2018/19.

4. All Social Work Posts (Chart 5.3)

- 4.1 On the supply side, graduates of part-time degree programmes requiring social work academic qualification (such as diploma / higher diploma / associate degree in social work) and / or RSW qualification for admission are not counted on the assumption that most of them may already occupy social work posts before graduation. On the demand side, wastage cases involving inter-grade movement are excluded from the new demand for All Social Work Posts in order to avoid double counting.
- 4.2 Generally speaking, the new supply of social work graduates showed a downward trend during the period from 1997/98 to 2004/05 but has been on the rise since 2005/06.
- 4.3 There were fluctuations in the new demand for All Social Work Posts in past years, with the highest being recorded in 2007/08.
- 4.4 Although the new demand for All Social Work Posts exceeded the new supply of graduates during the period from 2004/05 to 2008/09, the gap was readily filled up by the remaining graduates of previous years. The new demand and new supply were of relatively similar level during the period from 2009/10 to 2015/16. For 2016/17, the new supply exceeded the new demand, i.e. 1 178 vis-à-vis 1 020. It is projected that the new supply will continuously exceed the new demand in 2017/18, i.e. 1 182 vis-à-vis 821. However, as for 2018/19, it is anticipated that the new demand for All Social Work Posts will increase significantly to a level higher than that of the new supply of social work graduates, i.e. 1 347 vis-à-vis 1 236. (please refer to the projected manpower requirements figures in Part II).

Chart 5.1 Demand-Supply Analysis (Degree Posts)

● New demand for diploma posts
 ■ New supply of diploma/associate degree graduates

Note: * Projected figures

Chart 5.3 Demand-Supply Analysis (All Social Work Posts)

(B) Entry Rates of Degree and Diploma / Associate Degree Graduates by Year of Graduation and Post Type

1. Point to Note

- 1.1 For simplicity in presentation, graduates who have obtained social work posts before graduation are counted as entering the profession in their year of graduation.

2. Degree Graduates (Charts 5.4a and 5.4b)

- 2.1 Chart 5.4a presents the proportion of degree graduates first obtaining Degree Posts by number of years after graduation. The proportion of degree graduates obtaining Degree Posts during the first year after graduation ranged from slightly over 40% for graduates of Year 2011 to around 19% for graduates of Year 2016. This trend demonstrates that job opportunities of Degree Posts dropped substantially in recent years, i.e. the proportion of graduates working in Degree Posts during the first year after their graduation is decreasing.
- 2.2 A number of degree graduates obtained Degree Posts a few years after their graduation. It is observed that some of them are willing to enter the sector by taking up a lower grade post first (i.e. Diploma Posts) and then seek for job opportunities in Degree Posts in the sector.
- 2.3 Chart 5.4b presents the proportion of degree graduates first obtaining social work posts (i.e. either Degree or Diploma Posts) by number of years after graduation. It is noted that the proportion of degree graduates obtaining social work posts during their first year after graduation stayed at a relatively high level (over 65%) for graduates of Years 2011 to 2016. The difference in results of Charts 5.4a and 5.4b may be caused by the higher flexibility in employment under the Lump Sum Grant Subvention System, which allows NGOs to set RSW as the minimum entry requirement for their new social work posts. Furthermore, some degree graduates may be willing to accept Diploma Posts as their first step for entering the social work field or graduates of part-time degree programmes previously working in Diploma Posts might hold such posts continuously upon their first year of graduation.

3. Diploma / Associate Degree Graduates (Chart 5.5)

- 3.1 The proportion of diploma / associate degree graduates obtaining Diploma Posts during the first year after graduation stood at a relatively low level for graduates of Year 2011 (44%). The low entry rate of diploma / associate degree graduates, alongside the high entry rate of degree graduates to social work posts, indicated that a number of the Diploma Posts were taken up by degree graduates. Except for Year 2014 (43%), the entry rates in the first year after graduation for graduates of Years 2012 to 2016 were all below 40% (between 34% and 39%).

**Chart 5.4a Proportion of Degree Graduates Who First Obtained Degree Post
by Number of Years after Graduation**

Chart 5.4b Proportion of Degree Graduates Who First Obtained Social Work Post by Number of Years after Graduation

Chart 5.5 Proportion of Diploma / Associate Degree Graduates Who First Obtained Diploma Post by Number of Years after Graduation

(C) Turnover Rates and Wastage Rates of Social Work Posts by Post Type

1. Points to Note

1.1 The turnover rate and wastage rate of Diploma Posts were generally higher than the respective rates of Degree Posts in the corresponding years, which might partially be attributed to the fact that a number of SWP previously holding Diploma Posts had taken up Degree Posts in later years. Such cases are regarded as wastage and turnover cases for Diploma Posts but new entrants for Degree Posts.

2. Turnover Rates (Chart 5.6)

2.1 The number of turnover cases of All Social Work Posts is equal to the sum of the number of turnover cases of Degree and Diploma Posts.

2.2 All the turnover rates of Degree, Diploma and All Social Work Posts dropped significantly during the period from 1995/96 to 1999/2000. The downward trend reversed and the turnover rates remained relatively stable during the period from 2000/01 to 2003/04. Coupled with the recovery of the economy and other factors, the turnover rates of Degree, Diploma and All Social Work Posts gradually increased during the period from 2004/05 to 2006/07. After that, the turnover rates for Degree Posts were quite stable.

2.3 The turnover rates for Diploma and All Social Work Posts dropped during 2007/08 to 2009/10, and then rose slightly in 2010/11. In 2011/12, the turnover rates for both the Degree and All Social Work Posts moved upwards. However, the turnover rates for Degree, Diploma and All Social Work Posts moved downwardly in both 2012/13 and 2013/14. While the turnover rates for Degree Posts and All Social Work Posts rose in 2014/15, a slight drop was recorded in the turnover rate for Diploma Posts. There were increases in the turnover rates for Degree, Diploma and All Social Work Posts in 2015/16. The turnover rates for Degree and All Social Work Posts dropped in 2016/17, but a rise was recorded in the turnover rate for Diploma Posts.

3. Wastage Rates (Chart 5.7)

3.1 The number of wastage cases of All Social Work Posts is equal to the sum of wastage cases of Degree and Diploma Posts minus the number of cases involving inter-grade movement (i.e. cases switching from Diploma Posts to Degree Posts or vice versa).

3.2 The wastage rates of Degree, Diploma and All Social Work Posts fluctuated more noticeably when compared with the turnover rates in the corresponding years. Nevertheless, the wastage rate of All Social Work Posts rose gradually during the period from 2001/02 to 2006/07, indicating more social workers might have left for non-social work jobs during the economic recovery or for other reasons. After that, the wastage rates of Degree Posts remained relatively stable.

3.3 The wastage rates of Diploma and All Social Work Posts dropped in the years 2007/08 and 2008/09 but rose again in 2009/10 and 2010/11. In 2011/12, there were mild increases in the wastage rates for Diploma and Degree Posts but a decrease for All Social Work Posts. In 2012/13, there were decreases in the wastage rates for Degree and Diploma Posts whilst an increase was recorded in the wastage rate for All Social Work Posts. As for 2013/14, it was noted that there were increases in the wastage rates for Degree Posts, Diploma Posts and All Social Work Posts. The wastage rates for Degree, Diploma and All Social Work Posts moved downwardly in 2014/15, but they all rose again in 2015/16. While the wastage rates for Degree Posts and All Social Work Posts dropped in 2016/17, a rise was recorded in the wastage rate for Diploma Posts.

Chart 5.6 Turnover Rate of Social Work Posts by Post Type

Chart 5.7 Wastage Rate of Social Work Posts by Post Type

Note: The wastage rates of All Social Work Posts before Year 1997/98 are not available.

APPENDIX I TERMS OF REFERENCE AND MEMBERSHIP OF THE JOINT COMMITTEE ON SOCIAL WORK MANPOWER REQUIREMENTS

1. BACKGROUND

- 1.1 The **Joint Committee on Social Work Manpower Requirements**, formerly known as the Joint Committee on Social Welfare Manpower Planning System, is set up to undertake the collection and analysis of information on the demand and supply of SWP in Hong Kong.

2. TERMS OF REFERENCE

- 2.1 To interpret and analyse the collected manpower data to keep track of the manpower situation in the social work field and to provide information for policy makers to look into the likelihood of any future shortage of social workers so as to ensure adequate supply of social workers for publicly-funded services.
- 2.2 To prepare the annual report for reference by bodies including EDB, Labour and Welfare Bureau, Social Welfare Advisory Committee, Advisory Committee on Social Work Training and Manpower Planning, participating organisations, local training institutions and relevant organisations including the University Grants Committee and the Hong Kong Council for Accreditation of Academic and Vocational Qualifications.
- 2.3 To consider and make recommendations on special requests for the release of aggregate data.

3. MEMBERSHIP

- 3.1 The Committee comprises representatives of the Social Welfare Department (SWD) and the Hong Kong Council of Social Service (HKCSS). Its membership as at March 2018 is as follows -

Chairperson :	Mrs Frances YIM TSE Kai-li	(SWD)
Members :	Ms Rainbow CHEUNG Kam-hung, JP	(HKCSS)
	Dr FUNG Cheung-tim	(HKCSS)
	Cliff CHOI Kim-wah	(HKCSS)
	Prof WONG Yu-cheung	(HKCSS)
	Ms Jenny YAN Lai-ming	(SWD)
	Andrew KWAN Kai-ming	(SWD)
Secretary :	Ms Jacqueline KWAN Pui-yin	(SWD)

APPENDIX II OVERVIEW OF METHODOLOGY

Appendix II (A) System Updating and Maintenance

1. OBJECTIVES

1.1 The **SWMRS** is maintained by the SWMRS Office in SWD, with the following objectives:

1.1.1 To collect information on the demand and supply of SWP to keep track of the manpower situation in the social work field; and

1.1.2 To provide information for policy makers to look into the likelihood of any future shortage of social workers so as to ensure adequate supply of social workers for services funded by public money.

2. COVERAGE

2.1 The SWMRS covers various local organisations which employ SWP in different sectors which are broadly classified into three categories, namely, (a) government departments including SWD; (b) local TIs offering social work training programmes; and (c) NGOs, including all subvented and self-financing welfare organisations, other major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools), hospitals under HA, special schools subvented by EDB, and service units subvented by HAB.

2.2 All SWP engaging in posts requiring social work training in the sectors mentioned in paragraph 2.1 above, i.e. the following ranks or equivalent, are covered by the System:

- (a) *Directorate posts requiring social work training*
- (b) *Principal Social Work Officer (PSWO)*
- (c) *Chief Social Work Officer (CSWO)*
- (d) *Senior Social Work Officer (SSWO)*
- (e) *Social Work Officer (SWO)*
- (f) *Assistant Social Work Officer (ASWO)*
- (g) *Teaching staff of social work discipline in local TIs*
- (h) *Chief Social Work Assistant (CSWA)*
- (i) *Senior Social Work Assistant (SSWA)*
- (j) *Social Work Assistant (SWA)*
- (k) *Other posts requiring social work training*

3. DATA COLLECTION AND UPDATING

- 3.1 To acquire up-to-date information for the SWMRS, comprehensive updating exercises are conducted annually by asking each of the organisations to provide updated information on all SWP working in it and report any staff movement during the reference year.
- 3.2 In each updating exercise, a number of lists based on the most up-to-date information kept in the System are prepared and distributed to individual organisations on a restricted basis. They include basic information of (a) all SWP serving in individual organisations at a specific reference date; and (b) new recruit and turnover cases that are known during the reference year. The organisations are requested to check and update the lists against their records and return them to the SWMRS Office.
- 3.3 To set up the System, a large scale data collection exercise was first launched in late September 1987 to collect information on the personal particulars of SWP as at 30 September 1987. Since then, a total of 30 comprehensive updating exercises have been carried out.

4. CONFIDENTIALITY OF DATA

- 4.1 The data maintained in the SWMRS are **analysed and presented in aggregate form**. Data pertaining to individual SWP and organisations is kept in strict confidence and will not be released to any other parties including other government bureaux / departments.

5. RESPONSE TO THE LATEST UPDATING EXERCISE

- 5.1 In the latest updating exercise covering the period from 1 April 2016 to 31 March 2017, a total of **834** organisations (including SWD, 817 NGOs⁽¹⁾, and 16 local TIs) were approached. 765 replies were received with a response rate of 91.7%. Among them, 493 organisations confirmed that they had employed SWP in the reference year (i.e. 64.4% responding organisations have employed SWP in the reference period). Out of the 69 non-responded organisations, 26 of them had replied in the last updating exercise that they had employed SWP. On this basis, it is assumed that the data of these 26 non-responded organisations have remained unchanged since the last updating exercise.
- 5.2 A list of the **477** NGOs⁽¹⁾ **employing SWP** (including the responded and non-responded NGOs employing SWP) covered by the System is at *Appendix II (D)*.

Note : (1) Including all subvented and self-financing welfare organisations, other major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools), hospitals under HA, special schools subvented by EDB, and service units subvented by HAB.

Appendix II (B) Compilation Method

1. INTRODUCTION

- 1.1 The compilation is carried out by taking stock of the social work posts at the base year and carrying them forward to subsequent year. The projected new supply depends largely on the estimated number of graduates of local TIs in the year. On the other hand, the projected new demand covers the net additional staff requirements as reported by participating organisations and the demand for replacement of wastage.

2. PROJECTED NEW SUPPLY

2.1 Projected New Supply for a Year

- 2.1.1 Projected new supply for a year = Estimated number of fresh social work graduates in local TIs in the year x (1 - projected non-entry rate) + Estimated number of new entrants with qualifications obtained overseas.

2.2 Graduates of Local TIs for the Year

- 2.2.1 The number of fresh graduates for each year of the projection period is estimated by the respective local TIs on the basis of their latest available information on the number of intakes for all social work courses in September 2017 (figures for graduates corresponding to intakes up to academic year 2016/17 were based on the triennial plan covering academic years 2016/17 to 2018/19. For Degree Posts, full-time or part-time degree / post-graduate programmes only attended by SWP holding Degree Posts are excluded from the supply side. For All Social Work Posts, full-time or part-time degree / post-graduate programmes attended by serving SWP are excluded.). Possible drop-outs during the courses have been taken into account in their estimation as far as possible.
- 2.2.2 The figures are subject to the change of circumstances such as re-allocation of funding within local TIs and the enrolment situation of self-financed programmes.
- 2.2.3 A breakdown of the estimated number of graduates by training programme is at *Appendix III (A)*.

2.3 Wastage Rate of Graduate Supply

- 2.3.1 Wastage rate of graduate supply refers to the proportion of new graduates and remaining graduates who have decided not to enter the social work field at the beginning of each reference year.
- 2.3.2 The wastage rate of graduate supply is assumed to be constant for all new graduates of current year and remaining graduates in all preceding years. The wastage rate is estimated by the following constraint optimisation exercise:

Maximise: Yearly wastage rate

Subject to the following constraints:

- (i) the net entrant rate⁽¹⁾ of current year graduates is not less than that of previous years' remaining graduates (if the number of remaining graduates at the beginning of the year is greater than 50); and
 - (ii) the net entrant rate of remaining graduates for the period cannot exceed 100%.
- 2.3.3 The estimated yearly wastage rates of degree and diploma / associate degree graduates based on the above optimisation exercise are 8.0% and 16.2% respectively.

2.4 New Entrants with Qualifications Obtained Overseas

- 2.4.1 This category applies to both degree / post-degree graduates and diploma / associate degree graduates.
- 2.4.2 The figures are estimated by taking the average of actual new entrants with qualifications obtained overseas in the past three reference years (i.e. 2014/15 to 2016/17 for this updating exercise).
- 2.4.3 While there are more unknown factors in estimating the number of new entrants with qualifications obtained overseas, its effect on the accuracy of the projection would be relatively insignificant as it is small in number of overseas graduates.

Note : (1) The net entrant rate of graduates is defined as the number of graduates taking up social work posts during the year divided by the net supply of graduates at the beginning of the year.

2.5 **Limitations**

- 2.5.1 Whether graduates will enter the social work field depends on a number of complex factors, including the choices of the graduates such as pursuing further studies / entering the social work field in the Mainland or overseas, their career aspiration, the socio-economic environment, the unemployment conditions, the availability of social work posts, relative attractiveness of other jobs in the local labour market, etc. It should be noted that as the number of overseas graduates is insignificant, the number of graduates is basically pre-determined by the number of intakes into publicly-funded and self-financing places by local TIs back to the first year study of the relevant cohort of graduates.
- 2.5.2 Since the graduates who are still looking for jobs in the social work field cannot be easily identified, it is difficult to verify the estimates of non-entry rate and the number of remaining graduates.
- 2.5.3 One factor which complicates both the estimation of the non-entry rate and the number of remaining graduates is that the graduates may not enter the field in the year of their graduation. It is always difficult to forecast when they will take up jobs requiring their social work qualifications. The number of remaining graduates depends very much on the availability of posts that the graduates may have interest in.
- 2.5.4 To take into account the possible factors set out in paragraphs 2.5.1 to 2.5.3 would require further studies on the entry patterns of fresh graduates. However, it is beyond the scope of this statistical exercise to conduct these studies.
- 2.5.5 Patterns on the years when fresh graduates took up jobs requiring their respective qualifications and the non-entry rates are at *Appendix III (B)*.

3. **PROJECTED NEW DEMAND**

3.1 **Methodology**

- 3.1.1 Projected new demand for a year =
- Estimated net additional staff requirements for the year
 - + Estimated replacement for wastage for the year
 - + Shortfall of supply for the previous year
 - Estimated number of Diploma Posts filled by degree graduates in the current year
(for the new demand for diploma / associate degree graduates only)

3.2 **Net Additional Staff Requirements**

- 3.2.1 For the years 2017/18 and 2018/19, the estimated number of **new posts (less the number of posts to be deleted)** for the following sectors are included:

- (a) *all posts in SWD;*
- (b) *SWD-subvented posts in NGOs; and*
- (c) *non-SWD-subvented posts and other posts (non-SWD-subvented posts include those subvented by EDB and HAB while other posts include those in HA, non-subvented posts in NGOs, local TIs and major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools).*

- 3.2.2 The estimated numbers of new posts in SWD and the SWD-subvented sector in NGOs for 2017/18 and 2018/19 are compiled by making reference to the information known to SWD in November 2017. They are estimates of **approved projects with funding allocation**. The estimates for subvented new projects in NGOs are notional for planning purpose and may vary from the actual number of posts turning up in the sector. The estimated number of new posts for non-SWD-subvented posts and others are made by referring to the information on manpower requirements provided by NGOs, local TIs and major non-conventional settings in September 2017.

(Note: Starting from the 2007 round of updating exercise, a modified approach is employed for calculating the net additional staff requirements figures for the second projection year in order to take into account the more conservative approach adopted by most of the data suppliers in the estimation. Thus, the net additional staff requirements for 2018/19 is obtained by averaging the (a) projected figure collected from the data suppliers; and (b) projected figure compiled by using the annual growth rate derived from a five-year moving average.)

3.3 Replacement for Wastage

3.3.1 Estimated replacement for wastage of respective post =

Estimated average strength for the year x Projected wastage rate on strength

3.3.2 Since the strength at the end of the year depends on the supply and demand, the replacement for wastage is estimated by the following formulae:

(a) In case there is a shortfall for the year, replacement for wastage =

$$\frac{[\text{Strength at beginning of the year} + 0.5 (\text{Projected new supply})] \times \text{Projected wastage rate}}{1 + 0.5 (\text{Projected wastage rate})}$$

(b) In case there is a surplus for the year, replacement for wastage =

$$[\text{Strength at beginning of the year} + 0.5 (\text{Net additional staff requirements})] \times \text{Projected wastage rate}$$

3.3.3 For 2017/18 and 2018/19, three-year weighted average wastage rate of 2014/15, 2015/16 and 2016/17 is taken as the projected wastage rate of respective grade.

3.3.4 Estimated replacement for wastage for All Social Work Posts =

Estimated replacement for wastage for Degree Posts
+ Estimated replacement for wastage for Diploma Posts
- Estimated number of cases switching from Diploma Posts to Degree Posts
- Estimated number of cases switching from Degree Posts to Diploma Posts

3.3.5 Detailed figures on the wastage rates are at *Appendix III (C)*.

3.4 Limitations

- 3.4.1 It should be noted that the estimated number of net additional new posts is subject to the change of circumstances. For the current exercise, impact of certain factors which would affect the future demand of SWP could not be fully reflected. They include but are not limited to changes in economic and social situation which may affect the demand for welfare services, the flexibility of organisations in employment matters under the Lump Sum Grant Subvention System, contracting-out of welfare services, slippage of welfare projects and / or introduction of new welfare initiatives within the projection cycle, etc.
- 3.4.2 The numbers of new posts for non-SWD-subvented and other sectors are estimated by individual parties concerned as known in September 2017. It is difficult to ascertain their accuracy. For new funding initiatives in the non-welfare sector, there is also difficulty in translating them to more concrete manpower requirements for SWP. Besides, the numbers of new posts for SWD-subvented ones are ball-park estimates subject to change in their project schedules.
- 3.4.3 It is also difficult to forecast the wastage rate of social work manpower in the future years, which would be affected by a number of factors. Such factors include the availability of other jobs in the labour market, competition from overseas / the Mainland for social work staff, personal choice for leaving the sector such as further studies / family commitment / health reason / early retirement / extension of retirement age, changes in career aspiration / working environment / career prospects, etc. To take such factors into account requires the making of a number of judgmental assumptions, which are beyond the scope of this statistical exercise.

4. ESTIMATED NUMBER OF DIPLOMA POSTS FILLED BY REMAINING DEGREE GRADUATES

4.1 Proportion of Diploma Posts filled by Degree Graduates

4.1.1 The proportion of Diploma Posts filled by degree graduates is defined as:

$$\frac{(3\text{-year average conversion factor of degree holder to diploma holder from 2014 to 2016} \times \text{Surplus of degree graduates for Diploma Posts})}{[(3\text{-year average conversion factor of degree holder to diploma holder from 2014 to 2016} \times \text{Surplus of degree graduates for Diploma Posts}) + \text{New supply of diploma / associate degree graduates} + \text{Remaining diploma / associate degree graduates in previous years}]}$$

4.1.2 Surplus of degree graduates for Diploma Posts =

- New supply of degree graduates for a year (excluding part-time degree graduates)
- Number of non-entrants
- + Number of previous years' remaining degree graduates not holding Diploma Posts
- New demand for Degree Posts (excluding wastage cases involving inter-grade movement from Diploma Post to Degree Posts)

It is assumed that the wastage cases involving inter-grade movement (i.e. from Diploma Posts to Degree Posts) would be filled by degree graduates holding Diploma Posts.

4.2 Conversion Factor of Degree Holder to Diploma / Associate Degree Holder

4.2.1 The conversion factor in a specific year is defined as:

$$\left(\frac{\text{Diploma Post filled by degree graduates}}{\text{Diploma Post filled by diploma / associate degree graduates}} \right) \times \left(\frac{\text{New supply of diploma / associate degree graduates} + \text{Remaining diploma / associate degree graduates in previous years}}{\text{Remaining degree graduates available for Diploma Posts}} \right)$$

4.2.2 The remaining degree graduates available for Diploma Posts is the sum of the surplus of current-year degree graduates and the surplus of previous years' remaining degree graduates not having occupied any social work posts.

4.2.3 Surplus of current-year degree graduates =

- Number of current-year degree graduates
- Number of non-entrants
- Estimated recruitment of Degree Posts from current-year degree graduates

4.2.4 Surplus of previous years' remaining degree graduates not having social work posts =

- Number of previous years' remaining degree graduates not having social work posts
- Estimated recruitment of Degree Posts from remaining degree graduates

5. REMAINING GRADUATES OF LOCAL TIs

5.1 Introduction

It is observed that some graduates do not enter the social work field in the year of graduation but may do so in later years. As such, it is believed that some graduates of previous years not entering the social work field will search for a job in the social work field after the first year of their graduation (hereafter called “remaining graduates”). Based on the assumptions mentioned in paragraphs 5.2 and 5.3 below, the numbers of “remaining graduates” are estimated as illustrated in paragraph 5.5 below.

5.2 Demand Assumption

The new demand for graduates of local TIs (assumed to be the total new demand minus supply of graduates with overseas qualification) in the current year would be met by the supply of not only graduates of local TIs in the current year but also remaining graduates in the preceding years.

5.3 Supply Assumptions

- (a) For Degree Posts, the number of remaining graduates (i.e. those not yet obtained any Degree Posts) as supply at beginning of a year =
Number of remaining degree graduates available for Degree Posts at the end of the previous year
x (1 - estimated yearly wastage rate for degree graduates)
- (b) For Diploma Posts, the number of remaining graduates (i.e. those not yet obtained any Diploma Posts) as supply at the beginning of a year =
Number of remaining diploma / associate degree graduates available for Diploma Posts at the end of the previous year
x (1 - estimated yearly wastage rate for diploma / associate degree graduates)
- (c) For All Social Work Posts, the number of remaining graduates (i.e. those not yet obtained any social work posts) as supply at the beginning of a year =
Number of remaining degree graduates available for Social Work Posts at the end of the previous year
x (1 - estimated yearly wastage rate for degree graduates)
+ Number of remaining diploma / associate degree graduates available for Diploma Posts at the end of the previous year
x (1 - estimated yearly wastage rate for diploma / associate degree graduates)
- (d) The graduates are of similar competitiveness irrespective of their years of graduation.

5.4 Compilation

Based on the observations in analysing the entry pattern of degree graduates of local TIs in recent years, the following survival rates for remaining degree graduates are assumed:

<u>Year after graduation</u>	<u>Survival rate (at beginning of year)</u>	<u>Conditional survival rate (for remaining degree graduates)</u>
0	1	-
1	0.92	0.92
2	0.846=0.92 ²	0.92
3	0.779=0.92 ³	0.92
4	0.716=0.92 ⁴	0.92
5	0.659=0.92 ⁵	0.92
6	0.606=0.92 ⁶	0.92

Therefore, *Number of remaining degree graduates available as supply at the end of a year =*
(Number of remaining degree graduates brought forward from the end of the preceding year x Conditional survival rate)
- Number of degree graduates entered Degree Posts during the year

5.5 Illustration

In Item V of Section 3 of Part II on page 7, the estimated number of degree graduates potentially available for joining social work field at the end of 2017/18 is 2 095 which is calculated as follows:

Estimated number of degree graduates potentially available for joining social work field as at end of 2017/18 =

- Estimated number of remaining degree graduates as at beginning of 2017/18
- + New supply of degree graduates in 2017
- New demand for Degree Posts in 2017/18

The estimated number of the remaining graduates as at beginning of 2017/18 is 1 845 which is the sum of remaining graduates in the previous six years (i.e. 99 in 2011; 174 in 2012; 247 in 2013; 325 in 2014; 417 in 2015 and 583 in year 2016). Compilation of the figures is illustrated as follows:

2011 graduates

<i>Reference year</i>	<i>At beginning of year (1)</i>	<i>Conditional survival rate at beginning of year⁽¹⁾ (2)</i>	<i>Remaining graduates at beginning of year (3) = (1) x (2)</i>	<i>Recruitment during the year (4)</i>	<i>Remaining graduates at end of year (5) = (3) - (4)</i>
2011/12	785	0.92	722	323	399
2012/13	399	0.92	367	56	311
2013/14	311	0.92	286	31	255
2014/15	255	0.92	235	34	201
2015/16	201	0.92	185	36	149
2016/17	149	0.92	137	29	108
2017/18	108	0.92	99		

2012 graduates

<i>Reference year</i>	<i>At beginning of year (1)</i>	<i>Conditional survival rate at beginning of year⁽¹⁾ (2)</i>	<i>Remaining graduates at beginning of year (3) = (1) x (2)</i>	<i>Recruitment during the year (4)</i>	<i>Remaining graduates at end of year (5) = (3) - (4)</i>
2012/13	811	0.92	746	228	518
2013/14	518	0.92	477	51	426
2014/15	426	0.92	392	53	339
2015/16	339	0.92	312	63	249
2016/17	249	0.92	229	40	189
2017/18	189	0.92	174		

2013 graduates

<i>Reference year</i>	<i>At beginning of year (1)</i>	<i>Conditional survival rate at beginning of year⁽¹⁾ (2)</i>	<i>Remaining graduates at beginning of year (3) = (1) x (2)</i>	<i>Recruitment during the year (4)</i>	<i>Remaining graduates at end of year (5) = (3) - (4)</i>
2013/14	851	0.92	783	210	573
2014/15	573	0.92	527	74	453
2015/16	453	0.92	417	74	343
2016/17	343	0.92	316	47	269
2017/18	269	0.92	247		

2014 graduates

<i>Reference year</i>	<i>At beginning of year (1)</i>	<i>Conditional survival rate at beginning of year⁽¹⁾ (2)</i>	<i>Remaining graduates at beginning of year (3) = (1) x (2)</i>	<i>Recruitment during the year (4)</i>	<i>Remaining graduates at end of year (5) = (3) - (4)</i>
2014/15	816	0.92	751	169	582
2015/16	582	0.92	535	71	464
2016/17	464	0.92	427	74	353
2017/18	353	0.92	325		

2015 graduates

<i>Reference year</i>	<i>At beginning of year (1)</i>	<i>Conditional survival rate at beginning of year⁽¹⁾ (2)</i>	<i>Remaining graduates at beginning of year (3) = (1) x (2)</i>	<i>Recruitment during the year (4)</i>	<i>Remaining graduates at end of year (5) = (3) - (4)</i>
2015/16	783	0.92	720	155	565
2016/17	565	0.92	520	67	453
2017/18	453	0.92	417		

2016 graduates

<i>Reference year</i>	<i>At beginning of year (1)</i>	<i>Conditional survival rate at beginning of year⁽¹⁾ (2)</i>	<i>Remaining graduates at beginning of year (3) = (1) x (2)</i>	<i>Recruitment during the year (4)</i>	<i>Remaining graduates at end of year (5) = (3) - (4)</i>
2016/17	871	0.92	801	167	634
2017/18	634	0.92	583		

Note : (1) $0.92 = 1 - 0.08$ (i.e. yearly wastage rate of degree graduates)

6. DEGREE GRADUATES OCCUPYING DIPLOMA POSTS

- 6.1 Degree graduates occupying Diploma Posts at the end of the year =
Number of degree graduates potentially available for joining social work field at
the end of the year
- Number of degree graduates not occupying Diploma Posts
- 6.2 Number of degree graduates not occupying Diploma Posts =
Surplus of degree graduates for Diploma Posts
- Number of Diploma Posts filled by degree graduates

7. ESTIMATED STRENGTH

- 7.1 Estimated strength at the beginning of a year =
Estimated strength at the end of the preceding year
- 7.2 Estimated strength at the end of a year =
Estimated strength at the beginning of the year
+ Expected net additional staff requirement to be filled for that year
- Expected new vacancies arising from wastage not likely to be filled for that year

Appendix II (C) Glossary

All Social Work Posts

It includes both Degree Posts and Diploma Posts.

Balance between New Supply and New Demand

For Degree Posts and All Social Work Posts, it is defined as the projected new supply less the projected new demand.

For Diploma Posts, it is defined as the projected new supply less the projected new demand plus Diploma Posts filled by Remaining Degree Graduates plus Diploma Posts filled by Degree Re-entrants.

Base Year

It refers to the year used as the beginning or the reference year for statistical compilation.

Degree Posts

It refers to posts requiring social work degree qualification or above.

Diploma Posts

It refers to posts requiring social work diploma / associate degree qualification or equivalent.

Grade

It refers to all posts bearing social work titles in the grade and those equivalents of similar entry requirement in social work qualification.

Graduates Potentially Available for Joining Social Work Field

It is defined as “Balance between New Supply and New Demand” *plus* the estimate of “Remaining Graduates”. In other words, it represents the estimated number of candidates as at end of the projection years, whom have been graduated in current and previous years, and are projected to be available for joining the field in subsequent years after discounting the yearly non-entrants on supply and the projected demand figures. **Negative value** implies that there would be inadequate potential entrants to meet the projected new demand. On the contrary, **Positive value** signifies that there would be potential entrants available for further expansion / improvement of services.

Highest Educational Attainment

It refers to the highest educational qualification related to the social work training (*for a person with no training in social work, his / her highest educational level is taken*).

Inter-grade Movement

An SWP post of a specific grade (e.g. Degree Post) in the specified period being filled by a person whose preceding post was in another grade (e.g. Diploma Post) in the field is regarded as a case of inter-grade movement.

NGOs

For the SWMRS, NGOs refer to all subvented and self-financing welfare organisations, other major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools), hospitals under HA, special schools subvented by EDB, and service units subvented by HAB. Special schools are not regarded as individual NGOs and are classified under their affiliated NGOs.

New Entrants to a Grade

It refers to persons who first entered the social work field in the grade in the specified period. *(SWP of Diploma Posts who switched to Degree Posts, in the same or different organisations, are regarded as new entrants to the Degree Posts and wastage to the Diploma Posts.)*

Non-entrants on Supply

For Diploma and Degree Posts, they refer to graduated students who do not enter their respective social work post types (*i.e. degree / master social work graduates to Degree Posts and diploma / associate degree graduates to Diploma Posts*). For All Social Work Posts, it refers to graduated students who do not enter any grades of the social work field. Non-entrants include both voluntary non-entrants (*those who choose not to enter the social work field on their own account*) and involuntary non-entrants (*those who are “forced” not to enter the respective grades due to insufficient vacant posts or other reasons*).

Rates

Non-entry Rate (%) of degree / diploma / associate degree graduates in a Year =
No. of non-entrants of degree / diploma / associate degree graduates
to the respective Degree / Diploma Posts for the year
$$\left(\frac{\quad}{\text{Total no. of degree / diploma / associate degree graduates for that year}} \right) \times 100\%$$

Turnover, Re-entrant and Wastage Rate (%) of a Grade in a Year =
No. of turnover / re-entrant / wastage cases of a grade for the year
$$\left(\frac{\quad}{\text{Average strength of the post type for that year}} \right) \times 100\%$$

Recruitment Cases

It refers to the number of “occurrences” of SWP recruited in the specified period. *(If a SWP has taken up more than one new job during the period, he / she would be counted more than once depending on the total number of new jobs in any organisations covered by the System that he / she has taken up.)*

Re-entrant Cases of a Grade in a Year

An SWP post of a specific grade being filled by a person whose preceding post was in the same grade is regarded as a re-entrant case. *(A part-time post being newly filled by a SWP who is currently serving in another full-time post in the field is regarded as a re-entrant case only if he / she has once resigned from a part-time or a full-time job.)*

Remaining Graduates

It refers to the graduates of previous years who have never entered the social work field and are available to join the field after discounting the yearly non-entrants on supply.

Strength / Social Work Posts

Unless otherwise specified, the number of Social Work Posts / strength refers to the number of **posts** (*full-time or part-time*) being filled by SWP. (A SWP holding two posts, either one full-time post and one part-time post or two part-time posts, would therefore be counted twice.)

Average Strength for a Year =

$$\frac{(\text{Strength as at beginning of the year} + \text{Strength as at end of the year})}{2}$$

Turnover Cases

It refers to the number of “occurrences” of SWP leaving any organisations for whatever reasons in the specified period, regardless of whether they have joined / would join the field again. (If a SWP has resigned from more than one job or resigned from more than one organisation during the period, he / she would be counted more than once depending on the total number of jobs that he / she has left.)

Wastage Cases of a Grade in a Year

It is defined as the number of turnover cases *less* the number of re-entrant cases for the grade. (SWP of the Diploma Posts who are transferred to the Degree Posts, in the same or different organisations, are regarded as new entrants to the Degree Posts and wastage to the Diploma Posts.)

Wastage Cases of the Whole Sector in a Year

It is defined as the sum of the number of turnover cases by grade *less* the sum of the number of re-entrant cases by the grade *less* the number of cases of inter-grade movement in a year.

Appendix II (D) List of Organisations Employing SWP Covered by the SWMRS

1. Social Welfare Department

2. Non-governmental Organisations⁽¹⁾

Note : (1) For the SWMRS, NGOs refer to all subvented and self-financing welfare organisations, other major non-conventional settings employing SWP (such as private elderly homes, private residential care homes for persons with disabilities and primary schools), hospitals under HA, special schools subvented by EDB, and service units subvented by HAB.

APPENDIX III STATISTICAL TABLES

Appendix III (A) Estimated Number of Graduates by Training Programme ⁽¹⁾

1. Number of Social Work Degree / Master Graduates⁽²⁾

<u>Training institution / programme</u>	<u>Year of graduation</u>				
	<u>2017</u>	<u>2018</u>	<u>2019</u>	<u>2020</u>	<u>2021</u>
<u>The Chinese University of Hong Kong</u>					
MSScSW – full-time, 2 years	54	61	56	56	56
MSScSW – part-time, 3 years	65	65	65	59	59
BSSc (Major in SW) – full-time, 4 years	51	47	51	47	55
<u>City University of Hong Kong</u>					
MSW – combined mode, 2 to 3 years	60	57	35	59	-
BSSSW – full-time, 4 years	83	92	94	85	85
BASW – part-time, 3 years	60	60	60	60	60
<u>Hong Kong Baptist University</u>					
MSScSW – part-time, 2 years	38	40	40	40	40
BSW – full-time, 4 years	65	56	75	75	75
<u>The Hong Kong Polytechnic University</u>					
MSW – part-time, 3 years	57	56	65	60	60
BASW – full-time, 4 years	84	86	51	56	51
BASW – part-time, 4 years	14	48	70	77	75
<u>The University of Hong Kong</u>					
MSW – full-time, 2 years	41	50	67	66	66
MSW – part-time, 3 years	43	28	41	45	48
BSW – full-time, 4 years	45	42	41	43	39
<u>Hong Kong Shue Yan University</u>					
BSW – full-time, 4 years	44	39	68	40	57
<u>Caritas Institute of Higher Education</u>					
BSSSW – full-time, 2 or 4 years	24	90	90	90	90
BSW – part-time, 3 years	-	-	55	55	55
<u>Gratia Christian College</u>					
BSW – full-time, 2 or 4 years	-	-	29	35	60
Total	828	917	1 053	1 048	1 031

Notes : (1) It refers to those local social work training programmes recognised by the Social Workers Registration Board (SWRB) (<http://www.swrb.org.hk/>). The information depends largely on the estimated number of graduates provided by the respective local TI as at November 2017.

(2) Number of graduates refers to those who would graduate in the summer of the respective years.

2. Number of Social Work Diploma / Associate Degree Graduates⁽¹⁾

<u>Training institution / programme</u>	<u>Year of graduation</u>				
	<u>2017</u>	<u>2018</u>	<u>2019</u>	<u>2020</u>	<u>2021</u>
<u>Community College of City University, City University of Hong Kong</u>					
AssSSSW – full-time, 2 years	128	72	72	72	72
AssSSSW – part-time, 3 years	52	52	36	36	36
<u>Hong Kong College of Technology</u>					
HDSW – full-time, 2 years	35	35	35	35	35
HDSW – part-time, 3 years	70	70	70	70	70
<u>Caritas Institute of Higher Education</u>					
HDSW – full-time, 2 years	108	108	108	108	108
HDSW – part-time, 3 years	54	54	54	54	54
<u>The Education University of Hong Kong</u>					
HDSW – full-time, 2 years	3	-	-	-	-
<u>The Hong Kong Institute of Vocational Education (Sha Tin) of the Vocational Training Council</u>					
HDSW – full-time, 2 years	75	75	75	75	75
<u>School of Continuing and Professional Studies, The Chinese University of Hong Kong</u>					
HDSW – full-time, 2 years	45	42	50	50	50
<u>Hong Kong Community College, The Hong Kong Polytechnic University</u> ⁽²⁾					
HDSW – full-time, 2 years	-	66	93	68	80
Total	570	574	593	568	580

Notes : (1) Number of graduates refers to those who would graduate in the summer of the respective years.

(2) The two-year full-time HDSW programme has been introduced. According to the latest information of the SWRB website (as at 11 October 2017), the first intake to Year 1 was in 2016/17.

Appendix III (B) Estimated Figures on Non-entry Rates

1. Analysis of Graduates by Year of First Entering the Respective Posts

Year of graduation	Total no. of graduates	<i>No. of graduates first entering the respective grades upon graduation⁽¹⁾</i>						Non-entry rate by Mar 17
		by Mar 12	by Mar 13	by Mar 14	by Mar 15	by Mar 16	by Mar 17	
Degree / Master Graduates First Entering Degree Posts								
2011	785	323 (41.1%)	379 (48.3%)	410 (52.2%)	444 (56.6%)	480 (61.1%)	509 (64.8%)	35.2%
2012	811		228 (28.1%)	279 (34.4%)	332 (40.9%)	395 (48.7%)	435 (53.6%)	46.4%
2013	851			210 (24.7%)	284 (33.4%)	358 (42.1%)	405 (47.6%)	52.4%
2014	816				169 (20.7%)	240 (29.4%)	314 (38.5%)	61.5%
2015	783					155 (19.8%)	222 (28.4%)	71.6%
2016	871						167 (19.2%)	80.8%
Diploma / Associate Degree Graduates First Entering Diploma Posts⁽²⁾								
2011	440	192 (43.6%)	247 (56.1%)	283 (64.3%)	293 (66.6%)	299 (68.0%)	304 (69.1%)	30.9%
2012	517		201 (38.9%)	282 (54.5%)	333 (64.4%)	354 (68.5%)	367 (71.0%)	29.0%
2013	533			185 (34.7%)	271 (50.8%)	338 (63.4%)	366 (68.7%)	31.3%
2014	597				257 (43.0%)	339 (56.8%)	390 (65.3%)	34.7%
2015	498					180 (36.1%)	250 (50.2%)	49.8%
2016	591						202 (34.2%)	65.8%

2. Analysis of Degree Graduates by Year of First Entering the Social Work Sector

Year of graduation	Total no. of graduates	<i>No. of graduates first entering the social work sector grades upon graduation⁽³⁾</i>						Non-entry rate by Mar 17
		by Mar 12	by Mar 13	by Mar 14	by Mar 15	by Mar 16	by Mar 17	
Degree / Master Graduates First Entering Degree / Diploma Posts								
2011	785	644 (82.0%)	674 (85.9%)	686 (87.4%)	693 (88.3%)	697 (88.8%)	697 (88.8%)	11.2%
2012	811		600 (74.0%)	644 (79.4%)	672 (82.9%)	681 (84.0%)	687 (84.7%)	15.3%
2013	851			604 (71.0%)	686 (80.6%)	709 (83.3%)	720 (84.6%)	15.4%
2014	816				580 (71.1%)	639 (78.3%)	654 (80.1%)	19.9%
2015	783					567 (72.4%)	624 (79.7%)	20.3%
2016	871						583 (66.9%)	33.1%

Notes : (1) Graduates who had entered their respective grades before graduation, for simplicity in presentation, were counted as entering the profession in their year of graduation.

(2) The figures exclude those diploma / associate degree graduates who first entered Diploma Posts after obtaining degree qualification.

(3) Graduates who had entered the sector before graduation, for simplicity in presentation, were counted as entering the profession in their year of graduation.

The figures in brackets represent the proportions of students who had entered their respective grades by the period.

Appendix III (C) Estimated Figures on Wastage Rates

<u>Year</u>	<u>Number of cases</u>			<u>Average strength</u>	<u>Rate on strength</u>		
	<u>Turnover cases</u>	<u>Re-entrant cases</u>	<u>Wastage Cases⁽¹⁾</u> = (a) - (b)		<u>Turnover rate</u>	<u>Re-entrant rate</u>	<u>Wastage rate</u>
	(a)	(b)	(c)	(d)	(e) = (a)/(d) x 100%	(f) = (b)/(d) x 100%	(g) = (c)/(d) x 100%
1. Degree Posts							
95/96	371	229	142	3 277	11.3	7.0	4.3

16/17	2 095	1 611	484	14 743	14.2	10.9	3.3

Notes : (1) The figures include cases involving inter-grade movement.
(2) The figures exclude cases involving inter-grade movement.

The figures in brackets represent wastage cases and rates for Degree and Diploma Posts after discounting inter-grade movement.

A negative wastage rate means that the sum of the number of re-entrant cases within the same grade and cases involving inter-grade movement is larger than the number of turnover cases in the respective year. It could be interpreted as that these cases may meet not only the requirements due to staff wastage in the year but also partly the demand arising from creation of new posts as well.
